

# YOUR PAGING SYSTEM SOLUTION

21st Century Business Equipment are the leading providers of on-site paging systems in W.A. Centrally located in West Perth, we provide fast and reliable service and support, 24 hours a day, 7 days a week.

**How can a paging system help you?** Patrons are notified the instant their table or meal is ready to collect, improving efficiency and reducing labour costs. What's more, you can increase sales by freeing customers to visit the bar or nearby areas rather than waiting in long queues.

With many different pager models available, you can choose one to suit your budget and venue environment. Increase your bottom line by investing in a paging system that delivers your customers a faster and smoother dining experience.

## IT'S AS EASY AS . . .

1

Give your customer a pager when they place their order, just like you would give them a table number.

2

When their order is ready, you can page the customer by typing into the transmitter the table or order number.

3

Your pager will alert the customer with a flash, beep or vibration that their meal is ready to collect.
