This is not unique to Epos Now Systems and should be considered when selecting a wifi solution.
7. Epos Now Systems are designed to work offline, but where no network connection (LAN or WAN) is available or the network connection is unreliable, some functionality is reduced.
8. Where Customer devices are used offline for long periods, the Customer must ensure that such devices are regularly (at least every 7 days) connected to the internet to ensure data is synchronised with its servers. 6. Epos Now may offer to collect the Hardware, however, it is the Customer's responsibility to document the cosmetic condition before the Hardware is collected by Epos Now (or Epos Now's third-party courier).
7. For each day after the five Working Days from the end of the rental period that Epos Now has not received the Hardware, Epos Now will charge an additional sum of \$AUD 45 as applicable (excluding sales taxes) up to a total maximum equivalent of the new cost of the Hardware.
8. Upon return of the Hardware, Epos Now will inspect the Hardware and compile a report. Based on the report, a full refund of the deposit may be made, less any adjustments. If the Customer is eligible for a return of the deposit, this payment will be made within 14 Working Days of receiving the returned Hardware.

If the Hardware is returned in a damaged condition where the cost of repair or replacement exceeds the value of the deposit, Epos Now retains the right to invoice the Customer for an additional sum to cover the damage exceeding the value of the deposit. The Customer must pay this sum within 14 days of the date of the applicable invoice.
10. If the Hardware is not returned after 28 days after the rental period, Epos Now will withhold the entirety of the deposit and invoice the Customer for the remaining value of the Products and any charges outstanding. This must be paid within 14 days of the date of the applicable invoice.
