

An Intelligent Travel-Path Tracking Solution

VALID8

Persons conducting a business or undertaking who have management or control of a workplace must ensure, so far as is reasonably practicable, that the workplace, the means of entering and exiting the workplace and anything arising from the workplace is without health and safety risks to any person.

[Safe Work Australia, Code of Practice – Managing the Work Environment and Facilities, pp2, 4]

VALID8 is a Bluetooth based, zone and travel-path **tracking system** that utilizes state-of-the-art Apple iBeacon technology.

VALID8 ensures that key or sensitive zones are visited by members of staff, or security, as part of operational KPI'S.

VALID8 helps to assure the absence of hazards or hindrance, and tracks established Inspection Travel-Paths or Intox-Sweeps through the venue.

Ensure your operations are fully compliant and have the peace of mind that operational travel-paths can be captured and brought into evidence if required.

Don't guess it, **VALID8** it.

Detectors in each key zone identify and log unique ID's on a fob carried by any staff member, tracking the date and time of each visit. Zone status is displayed on any wireless device in a simple traffic-light format, indicating (according to pre-established criteria) if zones are OK or if a check is overdue.

- ✓ Safeguard against potential Health and Safety Liability Claims or RGL/LEU Penalties by an ability to prove regular zone checks.
- ✓ Zone-check scheduling and logging for internal KPI's, Health & Safety compliance and/or verification of intox-sweeps for RGL/Liquor Licensing compliance.
- ✓ VALID8 seamlessly integrates with a LOC8 system or can be a stand-alone system. No additional PC or server required.
- ✓ Fridge/Freezer Temperature sensor and monitoring optional module available.
- ✓ Logs are pushed to a cloud-based service, providing downloadable transcripts for review or compliance verification purposes.
